INTRODUCTION

GENERAL

This catalog contains the exploded views and replacement parts lists for serviceable components of Kawasaki snowmobiles. Always use GENUINE KAWASAKI parts for replacement to maintain the standards of reliability, performance, and safety that was designed into Kawasaki snowmobiles.

Use the Parts Catalog by following the explanations listed below.

1 INDEX

Locate the system or component that requires replacement parts in the pictorial index, and turn to the page number indicated for the exploded view and parts list.

2 EXPLODED VIEW

Each serviceable part in the exploded view is identified by a reference number. Use the reference number to locate necessary part information in the PARTS LIST BREAKDOWN.

Parts not shown disassembled in the exploded view are not sold separately, but are included in the complete unit or next higher assemblies as shown in the illustration.

Reference numbers connected to broken lines indicate assembly part numbers. All of the components inside the broken lines are included when the assembly part number is ordered.

Parts drawn with dotted lines are reference components used to show location of assemblies or proper positioning of replacement parts. Refer to the pictorial index to find the page number and exploded view for the reference components.

3 PARTS LIST BREAKDOWN

Always use the complete Kawasaki part number to order parts. Avoid shipping errors by ensuring the entire part number is legible.

Items in the description column preceded by a black dot indicate that this part is included in the above assembly.

When Right Hand and Left Hand descriptions are used, these positions are identified when looking from the back to the front of the snowmobile. (EXAMPLE: The manual starter is on the Right Hand side of the snowmobile.)

The quantity column indicates which snowmobile model the part is used on and the total quantity required for repair of the snowmobile. (EXAMPLE: The exploded view of the ski shows one ski, however, the quantity column contains the amount required to repair both skis.)

4 NUMERICAL PARTS INDEX

Each part number is listed numerically in the index located at the rear of this catalog. It contains the page number, for part location reference, along with quantity used per model. Use the numerical index to determine component location when only the part number is known.

GENERALITES

Le présent catalogue contient les vues détaillées des pièces internes et les listes de pièces détachées pour l'entretien des motoneiges Kawasaki. N'utilisez que des pièces de remplacement d'ORIGINE KAWASAKI afin de maintenir les standards de fiabilité, de performance et de sécurité qui sont le propre des motoneiges Kawasaki.

Pour utiliser le catalogue de pièces détachées, suivez les instructions ci-dessous.

1 REPertoire

Localisez le système ou l'élément nécessitant des pièces de remplacement dans le répertoire illustré et tournez à la page indiquée à laquelle vous trouverez la vue détaillée et la liste de pièces correspondantes.

2 VUE DETAILLEE MONTRANT LES DIFFERENTES PIECES DANS LEUR POSITION CORRECTE

Chaque pièce remplaçable est identifiée par un numéro de référence. Utilisez ce numéro de référence pour repérer les renseignements se rapportant à cette pièce dans la NOMENCLATURE DES PIECES DETACHEES.

Les pièces n'apparaissant pas démontées dans la vue détaillée ne sont pas vendues séparément mais font partie d'un bloc complet ou de l'ensemble suivant le plus proche, comme indiqué sur l'illustration.

Les numéros de référence reliés à des lignes brisées indiquent les numéros de pièces d'un ensemble. Tous les éléments situés à l'intérieur des lignes brisées sont compris dans la commande portant le numéro de pièces de l'ensemble.

Les pièces dessinées en pointillé sont des éléments de référence servant à montrer l'emplacement des ensembles ou le placement correct des pièces de rechange. Référez-vous au répertoire illustré pour trouver la page portant la vue détaillée des éléments de référence.

3 NOMENCLATURE DES PIECES DETACHEES

Indiquez toujours le numéro de pièce complet Kawasaki pour vos commandes de pièces. Assurez-vous que le numéro entier est parfaitement lisible afin d'éviter toute erreur à l'expédition.

Les articles précédés d'un point noir à la colonne "Description" indiquent que ces pièces font partie d'un ensemble.

Quand il existe des descriptions pour la Droite et la Gauche, ces positions sont identifiées en regardant la motoneige de l'arrière vers l'avant. (EXEMPLE! le démarreur à main se trouve du côté Droit de la motoneige.)

La colonne quantité indique le modèle de motoneige sur lequel la pièce est utilisée et le nombre total de pièces nécessaires à la réparation de la motoneige. (EXEMPLE! La vue détaillée du ski, montre un seul ski, toutefois, la colonne quantité indique tout ce qui est nécessaire à la réparation des deux skis.)

4 NOMENCLATURE DES PIECES DETACHEES

Chaque numéro de pièce fait partie d'une liste par ordre de grandeur numérique, dans la nomenclature qui se trouve à la fin du catalogue. Elle comprend le numéro de la page, la référence pour l'emplacement des pièces, ainsi que la quantité nécessaire par modèle. Lorsqu'on ne connaît que le numéro de la pièce, utiliser la nomenclature pour déterminer l'emplacement de l'élément.
